

BioPointe Scientific®

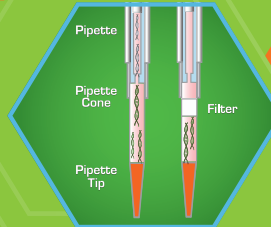

The New Standard of Excellence
in the Pipette Tip Industry

Our filtered tips exceed your expectations, boasting of the following features:

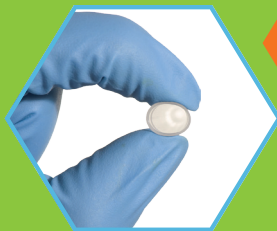

Precise Pointe Technology to achieve exact pipetting!

- Ultra-fine tip allows you to reach the bottom of vessels with accuracy and achieve total retrieval of samples.
- Thin plastic walls allows for lowest possible surface tension.

Filters made of ultra-high MW PE that is inert and consistent in porosity!

- Protect your samples and pipettors from contamination.

Super Seal ensures high quality and consistent performance!

- Thin-wall design allows the Super Seal to achieve a great fit.
- Soft, flexible material ensures tips are easy to insert and eject.

Tested and Certified by an independent lab to be RNase, DNase and Nucleic Acid Free

- Filters are manufactured in clean-room facility.

Sterilization by E-Beam that doesn't compromise performance!

- A precise dose of electron-beam sterilization that does not weaken our tips. In contrast to gamma irradiation, E-Beam does not alter or embrittle plastic.
